Editorial

This issue once again brings an installment of our *Product Hotline* listing, featuring products and services from many different vendors. As always, each vendor's contact address, including some whose products are *not* listed, is listed at the end of the product listings. If you have any questions, comments, or corrections, please let us know about them. In addition, if you have a product which you would like to be listed in the hotline, send a complete product description along with system requirements and retail price to *Product Hotline* at the regular mailing address.

I have also found out some more information about the upcoming Glenside Fest, planned for this May, from Tony Podraza. Some information concerning ticket pricing did not make it onto the advertisement. Those Fest attendees from age 10 to 5 will receive a $5.00 rebate off of the ticket price, and children 5 and under are free. In addition, there will be a special student rate. We'll get back to you with more information about the Fest and our regular columns next month!

ANNOUNCING: Invoice09

A program that produces professional looking invoices on blank computer paper. Ideal for light volume applications. The program is very flexible, but since you can preselect your options with a setup program it is also very easy to use.

Some of the program's options include support for color printers, automatic journal entries if you use the accounting level 2 package, automatic search through an address database with every new entry being added to the database and the option to print the address on an envelope.

The utilities in the package include a database manager for the address database with printing capabilities for mailinglists/labels, a setup program, installation routines and a program that produces sales listings and summaries by product or customer.

The database manager can also be used as a standalone program for personal use: holding names, addresses and telephone numbers of family, friends, etc.

System requirements: OS9 level 2 and a printer that supports the IBM character set.

Each interface includes a user manual and software for use with HYPER I/O or OS-9. The CoCo XT hard disk interface is $69.95. The CoCo XT-RTC model, $99.95, adds a battery-powered real time clock / calendar for OS9 and BASIC.

Native Mode for $34.95!

Burke & Burke's $34.95 PowerBoost kit replaces your CoCo's 6809 with a high- performance Hitachi HD63B09E microprocessor. PowerBoost comes with our exclusive "tuneup" program, which uses the HD63B09E's advanced instructions to speed up many OS9 operations by an average of 40%. PowerBoost now includes software to run the 63B09E microprocessor in Native Mode for a 10% average speed increase over previous versions. Our implementation of Native Mode updates only the REL, BOOT, OS9P1, OS9P2, and CC3DISK modules; other modules require no modification.
